DIS Cloud

# Manage Your Dealership, Not Your Server with DIS Cloud

Tired of looking after your dealership's system server?

Make us your Application Solution Provider (ASP).  
DIS Cloud is affordable and easy to maintain.

## Reduce Server Costs

Save money on computer hardware maintenance, electrical power, added office cooling, and server replacements.

## Gain Flexibility

The complexities of system management are taken care of for you and will scale with your business as it grows.

## Reclaim Your Dealership

Regain the space occupied by your server, its uninterruptible power source and backup tape storage, while eliminating the associated noise.

## Peace of Mind

Rest assured knowing that your server resides in a secure building, protected from fire or natural disasters.

a Constellation Software Company

DIS Cloud

## Take Your Dealership to New Heights. Here's How:

1.

First, we test your Internet performance to verify that it's adequate for your dealership.

2.

Then, we update your in-house software and data files (if needed).

3.

After that, dealership data is transferred directly from your server to the DIS Cloud at night to avoid disruption.

4.

The next morning, your staff is fully operational on DIS Cloud.

5.

All data and system settings are preserved.

## State of the Art Cloud Services

### DIS Cloud Hosting

We manage, maintain, and operate your server for you via the **DIS Hosting Service** – allowing you to focus on your business.

### DIS Cloud Backup

Eliminate the time, expense, and hassle of performing daily backups by automating the process with **DIS Cloud Backup**.

### No More...

- ✗ Paying for new servers, hardware maintenance, air conditioning, and electricity
- ✗ Performing daily and full system backups
- ✗ Updating software, price files, and IBM operating systems

### Because We...

- ✓ Look after a highly secure server for you, conduct hardware upgrades, and take care of air conditioning and electricity
- ✓ Do all the backups for you
- ✓ Conduct all your software updates

### Requirements:

- DIS supported or approved firewall
- Adequate internet performance (DIS will test this for you)
